## **Broadband And Data** **Specialist For Organisations**

# Broadband and Data Solutions for Organisations

Today, broadband and data is a crucial component in any organisation. As a dependable broadband specialist, REDtone has the resources, expertise and experience to meet the ever-changing demands in the market place.

REDtone is the only service provider in the industry with a unique suite of last-mile technologies such as Wireless Point-to-Point, Metro E, Fibre, Satellite, LTE (4G), WiMAX and Microwave. This enables us to provide infrastructure integration expertise and broadband-on-demand.

From IPVPN and leased lines, to customised solutions, our comprehensive suite of leading-edge WAN solutions provide secure and scalable connectivity to our customers.

REDtone is also the No. 1 WiFi infrastructure builder and operator in Malaysia, having successfully developed thousands of WiFi hotspots and many large scale WiFi projects in metropolitan areas, townships, malls, educational institutions, hotels and many other sites.

So, whatever your organisation needs, you can always depend on REDtone to deliver the right broadband and data solutions.

## Our Key Differentiators

### Customised Solutions For Better Price Performance

- Our ability and flexibility to integrate different technologies, customise solutions and offer broadband-on-demand have won us many customers from both the private and government sectors
- Our stringent quality control and focus on delivering the best solutions, coupled with top quality equipment from established brands, reinforce our reputation as a leading solutions provider

### High Focus On Service Level

- Customised Service Level Agreement (SLA)
- A state-of-the-art network for 24/7 bandwidth monitoring enables online performance tracking and measurement
- Speedy deployment time of only 7 working days\* (compared to average industry practice of 20 working days)
- POC (Proof Of Concept) or trial period to help customers decide when signing up or upgrading a package

### Service With High Redundancy

- We are equipped with multiple ISP redundancy which ensures 99.5% uptime
- We offer dedicated back-up lines for uninterrupted service

## Our Nationwide Network Infrastructure

- Our coverage encompasses West & East Malaysia
- Our network is designed with reach, stability and contingency in mind. All our Point-Of-Presence (POP) links have more than one link connection. These links are engineered to automatically switch over to another link when failure occurs. This is performed via network contingency and back-up configuration.
- We provide customised speed of up to 1Gbps or any speed that you require
- We provide infrastructure integration expertise and broadband-on-demand connectivity

## Customisation via Last-mile Technologies
