REDtone
Data Centre

ABOUT REDTONE

Since our inception over a decade ago, REDtone has evolved and expanded from a simple voice service provider into a full-fledged international telecommunications infrastructure provider. Today, we are the leading broadband and Wi-Fi solutions provider for organisations and the No. 1 Wi-Fi infrastructure builder in Malaysia.

REDtone's Data Centre complements our range of current offerings. This purpose-built Tier 3 Data Centre was designed for maximum availability, security and energy efficiency. Our wide spectrum of services enables enterprises to operate, compete and transform more effectively in a challenging business environment.

REDtone has served more than 15,000 corporate customers, encompassing multinational companies (MNCs), local conglomerates, public listed companies (PLCs), small-medium enterprises (SMEs) and Government-linked companies (GLCs). We have also leveraged on our technological expertise to facilitate greater connectivity across the nation, and have successfully implemented big-scale projects for several Government agencies including Universal Services Provision (USP) projects and Kampung Tanpa Wayar (KTW).
